

**Addendum 1**  
**Request for Proposal PMG20160211**  
**February 17, 2016**

1. Section A.2 of the Request for Proposal is being removed, Small Business Set Aside - Solicitation. There will still be preferences given to small businesses, however, not all the awards may go to a small businesses.
2. The following clause is being added:

**Multiple Awards**

(A30) Rev. 1 12/04/2013

Awards shall be made to the vendors with the higher scores, from the Best Value ranking as discussed in Section A.6, Basis of Award – Best Value. There is the intent of more than one company receiving an award from this solicitation.

**Questions and Answers:**

1. On the Statement of Work it was noticed that Principal Architect and Senior Architect are not defined in the Statement of Work. Do you wish to have the capability of architects for this procurement?

Table 2 of the Statement of Work for the following entries:

- Principal Engineer
- Senior Engineer
- Advanced Engineer
- Entry-Level Engineer

Should be interpreted to include the following engineering disciplines:

- Electrical
- Mechanical
- Civil
- Structural
- Architectural
- HVAC
- Fire Protection

2. Do you wish the bidders to provide billing rates?

Composite rates are being requested for each of the following Engineering disciplines.

- Electrical
- Mechanical
- Civil
- Structural
- Architectural
- HVAC
- Fire Protection

As there will be two option periods, composite rates for the option periods should be provided as well. The base period will be for one year from date of award, with the option periods also being one year. Do not provide rates based on fiscal years.

3. Is it possible that MSA could provide a list of Site-approved software and require this verification/validation effort only for COTS software that is not listed?

The primary items of software for the engineering deliverables expected to be produced for this subcontract are listed in Section 4.0 of the Statement of Work and these are AutoCAD (version 2013 or later), and Mathcad Prime 3.1. A list of Site-approved software will not be provided. Please note that any subcontractor's use of Commercial Off-the-Shelf Software (including AutoCAD and Mathcad Prime 3.1) in the production of engineering deliverables must meet the requirements of Section 7.1.4 of the Statement of Work.

4. This is all small business set-aside with the gross revenue capped at \$15M. We gross more than that in a year so we would not qualify unless we subcontract to a small business.

This is now open competition with the deletion of Section A.2.
